The American Association of State Highway and Transportation Officials recently released the 7 th edition of its “Policy on Geometric Design of Highways and Streets” manual - commonly referred to as the “Green Book” - which is considered by many to be the pre-eminent industry guide to current highway and street design research and practices. AASHTO said the latest edition of the “Green Book” presents an updated framework for geometric design that is more flexible, multimodal ...

AASHTO Releases 7th Edition of its Highway & Street Design ...

First published in 2001, AASHTO’s guidelines aim to help highway engineers select appropriate geometric designs for local and collector roads with low daily traffic volumes. AASHTO said the first edition of its low-volume guidelines addressed the design needs of roads carrying average daily traffic volumes of 400 vehicles per day or less. The new second edition of its low-volume road guidance not only replaces the first edition but also includes design advice for local and minor collector ...
