Chapter 15 Solutions Supplemental Problems

Chapter 15 continued 15. If a submarine emits a sonar "ping" underwater and

Access Free Chapter 15 Supplemental Problems Solutions Key

detects an echo 4.00 s later, how far away is the object that reflected the echo? $d = (1533 \text{ s}) = 6130 \text{ m}$ Since the sound must travel from the source to the object and back to the source, the object detected would be at half that distance, or about 3060 m away.
