An example of why you may want to change a file type is due to software making backups. Now and then a program will make a backup of it and then one of the characters on the extension of the filename gets replaced with an underscore. Which would look like: filename.\_xe instead of filename.exe. Let's go through the steps in order to change the ...

### **C How To Program Deitel Manual Solutions | pdf Book Manual ...**

To use another program with the file, you'll just need to start that other program manually first, and then browse your computer for the particular file to open it. For example, you can open Microsoft Word and use its File > Open menu to open a DOC file that is normally associated with OpenOffice Writer, but doing so doesn't actually change the file association for DOC files as explained above.
