Sugar In The Blood A
Sugar in the Blood is a meticulously researched and fact-filled book! Andrea Stuart traces her ancestry back to the 1600's and then through slave times in the Caribbean. Much of the book is focused on her most distant relative, his transport from England (by choice!), and his lifestyle in the Colonial Caribbean.

People without diabetes typically have between 72-140 milligrams of glucose per 1 deciliter of blood. People who have diabetes tend to have slightly higher blood glucose, or sugar, levels at ...

Glucose blood test: What are normal blood sugar levels?
Blood glucose, or sugar, is sugar that is in your blood (easy enough!). It comes from the food that you eat -- foods that contain carbohydrate, such as bread, pasta and fruit are the main contributors to blood glucose. The cells in our bodies need glucose for energy -- and we all need energy to move, think, learn and breathe.

What Is a Normal Blood Sugar Level? - Diabetes Self-Management
High blood sugar occurs when your body can't effectively transport sugar from blood into cells. When left unchecked, this can lead to diabetes. One study from 2012 reported that 12-14% of US adults...
